PROFESSIONAL SUMMARY

I am a motivated Computer Science student at Karachi University Department of Computer Science with a strong foundation in programming and problem-solving. Looking to apply for technical and analytical skills in a dynamic tech environment.

EDUCATION

BS COMPUTER SCIENCE

UNIVERSITY OF KARACHI, KARACHI

2023 - PRESENT

INTERMEDIATE IN PRE-ENGINEERING

BAHRIA COLLEGE KARSAZ, KARACHI (A)

2022 - 2023

MATRICULATION IN SCIENCE

HAPPY HOME SCHOOL, KARACHI (A+)

2019 – 2021

SKILLS

Languages: C++, Java, Java Script, Python (Pandas, NumPy)

Front-End: React, HTML, CSS, React Native

Concepts: Basic Fundamentals, Data Structures & Algorithms, OOPS.

COURSES

1. Peoples Information Technology Program (PITP) - Data Science

PROJECTS

Movie Management System (Fronted Only)

TechStack: HTML, Java Script, CSS

- A Project made to Demonstrate the concepts of Object Oriented Programming.
- Pages Include: Admin Panel, Booking Page, Ticket Generator.

Deployment Link:

<https://abdullahmufeezz.github.io/Movie-Management-System/>

Expense Tracker (DSA Project)

Language: C++ | Concepts: Linked List, File I/O

- Built a console-based application to manage daily expenses.
- Implemented linked lists for dynamic data storage and management.
- Used file handling to save and retrieve expense data persistently.

https://github.com/abdullahmufeezz/Expense_Tracker_CPP.git

AutoCare – The Vehicle Service System

TechStack: React (Frontend), Node.js & Express.js(Backend), POSTGRES (Database)

- Full Stack Project designed to manage vehicle service booking.
- System handles real-time booking, confirmation, service status, and updates while ensuring data integrity.

Deployment Link:

<https://autocare-woad.vercel.app/>

Teen Mental Health Analysis using Machine Learning

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Google Colab

- Analyzed the impact of social media usage on teenagers' mental health using real-world dataset
- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) to identify key patterns
- Engineered relevant features including social media usage, sleep duration, stress, anxiety, and physical activity
- Built and evaluated Machine Learning models including Logistic Regression and Random Forest Classifier
- Visualized insights using graphs and charts to highlight relationships between lifestyle factors and mental health
